

## *Multispray Knapsack Sprayers*

16 Litre - 12 Volt Rechargeable Knapsack

16 Litre - Manual Knapsack

### **16 Litre - 12 Volt Rechargeable Knapsack**

These units come standard with a stainless steel lance and 4 different nozzle options. An adjustable hollow cone nozzle, Double hollow cone nozzle, Adjustable Sprinkler nozzle and flat fan nozzle. The pump is a 2.9 Litre per minute 12v electric diaphragm type with a built in pressure switch. Maximum pressure 4.5 Bar. Units are fitted with a 12v / 8 amp hour sealed lead acid battery. Charging time 8 to 10 hours with 4 to 5 hours of use.

### **16 Litre Manual Knapsack**

These units are supplied with the same fittings as the Rechargeable knapsack. Pressure is produced by vertical movements of the pump lever which compresses air in the pressure chamber. To maintain the pressure while using the sprayer, the lever must be operated every 5 to 15 steps, operating pressure 2 to 3 bar.

### **Features and Benefits:**

- \* Retained pressure system extends battery life and reduces use of pump lever on Manual models.
- \* Container is molded to ensure comfort against the operators back.
- \* All models have filler cap filters to ensure spray solution remains clean.
